# Content

程序代写代做 CS编程辅导

## → Foundations & Principles

- Intro, Lambda natural deduction [1,2]
- Higher Order (part 1) [2,3<sup>a</sup>]
- Term rewriting [3,4]

## → Proof & Specification Techniques

- Inductively defined sets, rule induction [4,5]
- Datatype induction, primitive recursion [5,7]
- General recursive functions, termination proofs [7<sup>b</sup>]
- Proof automation (part 2) [8]
- Hoare logic, proofs about programs, invariants [8,9]
- C verification [9,10]
- Practice, questions, exam prep [10<sup>c</sup>]

## More on Automation

程序代写代做 CS编程辅导

**Last time:** safe and unsafe, heuristics: use safe before unsafe

**be automated**

Automated methods (e.g. blast, clarify etc) are not hardwired.

Safe/unsafe elim rules can be declared.

**Syntax:**

WeChat: cstutorcs

[<kind>!] for safe rules (<kind> one of intro, elim, dest)

[<kind>] for unsafe rules

Assignment Project Exam Help

**Application (roughly):**

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

do safe rules first, search/backtrack on unsafe rules only

QQ: 749389476

**Example:**

declare attribute globally **declare** allE [intro!] allE [elim]

remove attribute globally **declare** allE [rule del]

use locally **apply** (blast intro: someI)

delete locally **apply** (blast del: conil)

## Exercises

### 程序代写代做 CS编程辅导

- derive the classical contradiction rule ( $\neg P \implies \text{False}$ )  $\implies P$  in Isabelle
- define **nor** and **nand** in Isabelle
- show  $\text{nor } x \ x = \text{nand } x \ x$
- derive safe intro and elim rules for them
- use these in an automated proof of  $\text{nor } x \ x = \text{nand } x \ x$

# What is Higher Order Logic?

程序代写代做 CS编程辅导

## → Propositional Logic

- no quantifiers
- all variables in a pool

## → First Order Logic

- quantification over values, but not over functions and predicates,
- terms and formulas syntactically distinct

## → Higher Order Logic:

- quantification over everything, including predicates
- consistency by types
- formula = term of type bool
- definition built on  $\lambda \rightarrow$  with certain default types and constants

WeChat: cstutorcs

Assignment Project Exam Help

Email: tutorms@163.com

QQ: 749389476

<https://tutorcs.com>

# Defining Higher Order Logic

程序代写代做 CS编程辅导

Default types:

→ **bool** sometimes called *o*

→  $\Rightarrow$  sometimes called *fun*

WeChat: [cstutorcs](#)

Assignment Project Exam Help

Default Constants:

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

→  $:: \text{bool} \Rightarrow \text{bool} \Rightarrow \text{bool}$

=  $:: \text{bool} \Rightarrow \text{bool}$

$\epsilon \quad :: (\alpha \Rightarrow \text{bool}) \Rightarrow \alpha$

<https://tutorcs.com>

# Higher Order Abstract Syntax

程序代写代做 CS编程辅导

**Problem:** Define syntax for binders like  $\forall$ ,  $\exists$ ,  $\epsilon$

**One approach:**  $\forall :: \text{term} \Rightarrow \text{bool}$

**Drawback:** need to do substitution,  $\alpha$  conversion again.

**But:** Already have binder, substitution,  $\alpha$  conversion in meta logic

Assignment ~~\~~ Project Exam Help

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

**So:** Use  $\lambda$  to encode all other binders.

QQ: 749389476

<https://tutorcs.com>

# Higher Order Abstract Syntax

程序代写代做 CS编程辅导

Example:

HOAS usual syntax

WeChat: cstutorcs

ALL  $(\lambda x. x = 2)$   $\forall x. x = 2$   
ALL  $P$   $\forall x. P\ x$

Email: tutorcs@163.com

QQ: 749389476

Isabelle can translate usual binder syntax into HOAS.

<https://tutorcs.com>

## Side Track: Syntax Declarations

程序代写代做 CS编程辅导

### → **mixfix:**

**consts**  $\text{drvbl} :: c \Rightarrow fm \Rightarrow \text{bool}$  ("\_, \_  $\vdash$  \_")

**Legal syntax not**

### → **priorities:**

pattern can be annotated with priorities to indicate binding strength

**Example:**  $\text{drvbl} :: ct \Rightarrow ct \Rightarrow \text{lm} \Rightarrow \text{bool}$

("\_, \_  $\vdash$  \_" [30, 0, 20] 60)

### → **infixl/infixr:** short form for left/right associative binary operators

**Example:**  $\text{or} :: \text{bool} \Rightarrow \text{bool} \Rightarrow \text{bool}$  ("  $\vee$  " 30)

### → **binders:** declaration must be of the form

$c :: (\tau_1 \Rightarrow \tau_2) \Rightarrow \tau_3$  (binder "B" < p >)

B x. P x translated into  $c$  P (and vice versa)

**Example** ALL ::  $(\alpha \Rightarrow \text{bool}) \Rightarrow \text{bool}$  (binder " $\forall$ " 10)

More in Isabelle/Isar Reference Manual (8.2)

## Back to HOL

程序代写代做 CS编程辅导

Base:  $bool, \rightarrow, ind, =, \longrightarrow, \varepsilon$

And the rest is def

True  $\equiv (\lambda x. x) = (\lambda x. x)$

All  $P \equiv P = (\lambda x. \text{True})$

Ex  $P \equiv \forall Q. (P \longrightarrow Q) \longrightarrow Q$

False  $\equiv \forall P. P$

$\neg P \equiv P \longrightarrow \text{False}$

$P \wedge Q \equiv \forall R. (P \longrightarrow Q \longrightarrow R) \longrightarrow R$

$P \vee Q \equiv \forall R. (P \longrightarrow R) \longrightarrow (Q \longrightarrow R) \longrightarrow R$

If  $P \times y \equiv \text{SOME } z. (P = \text{True} \longrightarrow z = x) \wedge (P = \text{False} \longrightarrow z = y)$

inj  $f \equiv \forall x y. f x = f y \longrightarrow x = y$

surj  $f \equiv \forall y. \exists x. y = f x$

# The Axioms of HOL

程序代写代做 CS编程辅导

$$\begin{array}{c}
 \frac{}{t = t} \text{ refl} \qquad \frac{s = \text{bst}}{s = \text{bst}} \text{ refl} \qquad \frac{\bigwedge x. f\ x = g\ x}{(\lambda x. f\ x) = (\lambda x. g\ x)} \text{ ext} \\
 \frac{P \Rightarrow Q}{P \Rightarrow Q} \text{ impl} \qquad \frac{P \longrightarrow Q \quad P}{Q} \text{ mp}
 \end{array}$$

WeChat: cstutorcs

$$\frac{(P \longrightarrow Q) \longrightarrow (Q \longrightarrow P) \longrightarrow (P = Q)}{(P \longrightarrow Q) \longrightarrow (Q \longrightarrow P) \longrightarrow (P = Q)} \text{ iff}$$

Assignment Project Exam Help

$$\frac{P = \text{True} \vee P = \text{False}}{P = \text{True} \vee P = \text{False}} \text{ True\_or\_False}$$

Email: tutores@163.com

$$\frac{P \text{ ? } x}{P \text{ (SOME } x. P\ x)} \text{ someI}$$

QQ: 749389476

<https://tutorcs.com>

$$\frac{\exists f :: \text{ind} \Rightarrow \text{ind. inj } f \wedge \neg \text{surj } f}{\exists f :: \text{ind} \Rightarrow \text{ind. inj } f \wedge \neg \text{surj } f} \text{ infTy}$$

That's it.

程序代写代做 CS编程辅导

- 3 basic constants
- 3 basic types
- 9 axioms

With this you can define and derive all the rest.

WeChat: cstutorcs

Isabelle knows 2 more ~~Axioms~~ **Assignment Project Exam Help**

$\frac{x = y}{x \equiv y}$  eq-reflection      ~~Email: tutors@163.com~~ the\_eq\_trivial  
(THE  $x. x = a$ ) =  $a$

QQ: 749389476

<https://tutores.com>

# Deriving Proof Rules

程序代写代做 CS编程辅导

In the following, we will

- look at the definition in more detail
- derive the traditional rules from the axioms in Isabelle

Convenient for deriving rules: **named assumptions in lemmas**

WeChat: cstutorcs

**lemma** [*name* :]

**assumes** [*name*<sub>1</sub> :] "*< prop >*<sub>1</sub>"

**assumes** [*name*<sub>2</sub> :] "*< prop >*<sub>2</sub>"

:

**shows** "*< prop >*" *< proof >*

<https://tutorcs.com>

**proves:**  $\llbracket \langle prop \rangle_1; \langle prop \rangle_2; \dots \rrbracket \implies \langle prop \rangle$

# True

程序代写代做 CS编程辅导

**consts** True :: bool

True  $\equiv (\lambda x :: \text{bool}. x)$

**Intuition:**

right hand side is always true

**Proof Rules:**

WeChat: cstutorcs

Assignment Project Exam Help

**Proof:**

Email: tutorcs@163.com

$$\frac{(\lambda x :: \text{bool}. x) \vdash (\lambda x. x)}{\text{True}} \text{ refl, unfold True\_def}$$

# Universal Quantifier

程序代写代做 CS编程辅导

**consts** ALL ::  $(\alpha \Rightarrow \text{bool}) \Rightarrow \text{bool}$   
ALL  $P \equiv P = (\lambda x. P x)$

## Intuition:

- ALL  $P$  is Higher Order Abstract Syntax for  $\forall x. P x$ .
- $P$  is a function that takes an  $x$  and yields a truth value.
- ALL  $P$  should be true iff  $P$  yields true for all  $x$ , i.e. if it is equivalent to the function  $\lambda x. \text{True}$ .

## Proof Rules:

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

$$\frac{\bigwedge x. P x}{\forall x. P x} \text{all} \quad \frac{\forall x. P x \quad P ?x \implies R}{R} \text{allE}$$

<https://tutorcs.com>

**Proof:** Isabelle Demo

# False

程序代写代做 CS编程辅导

**consts** False :: bool  
False  $\equiv \forall P.P$

## Intuition:

Everything can be derived from *False*.

WeChat: cstutorcs

## Proof Rules:

$\frac{\text{False}}{P}$   $\frac{\text{False}}{\text{FalseE}}$  ~~Assignment Project Exam Help~~  
True  $\neq$  False

Email: tutorcs@163.com

**Proof:** Isabelle Demo

QQ: 749389476

<https://tutorcs.com>

# Negation

程序代写代做 CS编程辅导

**consts** Not :: *bool* =  $\neg$   
 $\neg P \equiv P \longrightarrow \text{False}$

## Intuition:

Try  $P = \text{True}$  and  $P = \text{False}$  and the traditional truth table for  $\longrightarrow$ .

WeChat: cstutorcs

## Proof Rules:

Assignment Project Exam Help

$$\frac{A \equiv \text{False}}{\neg A} \text{notI} \quad \frac{A}{P} \text{notE}$$

QQ: 749389476

**Proof:** Isabelle Demo <https://tutorcs.com>

# Existential Quantifier

程序代写代做 CS编程辅导

**consts** EX ::  $(\alpha \Rightarrow b \Rightarrow t) \Rightarrow t \text{pol}$   
EX  $P \equiv \forall Q. (\forall x. P\ x \longrightarrow Q) \longrightarrow Q$

**Intuition:**

- EX  $P$  is HOAS for  $\exists x. P\ x$ . (like  $\forall$ )
- Right hand side is characterization of  $\exists$  with  $\forall$  and  $\longrightarrow$
- Note that inner  $\forall$  binds wide:  $(\forall x. P\ x \longrightarrow Q)$
- Remember lemma from last time:

$(\forall x. P\ x \longrightarrow Q) \implies ((\exists x. P\ x) \longrightarrow Q)$

**Proof Rules:**

$$\frac{P\ ?_x}{\exists x. P\ x} \text{ exI} \qquad \frac{\forall x. P\ x \implies R}{R} \text{ exE}$$

**Proof:** Isabelle Demo

WeChat: [tutorcs](#)

<https://tutorcs.com>

# Conjunction

程序代写代做 CS编程辅导

**consts** And :: *bool* = *bool* (*\_*  $\wedge$  *\_*)  
 $P \wedge Q \equiv \forall R. (P \longrightarrow Q) \longrightarrow R$

**Intuition:**

- Mirrors proof rules for  $\wedge$
- Try truth table for  $P$ ,  $Q$ , and  $R$

WeChat: cstutorcs

**Proof Rules:**

Assignment Project Exam Help

$$\frac{A \quad B}{A \wedge B} \text{ conjI} \quad \frac{A \wedge B \quad \llbracket A, B \rrbracket \longrightarrow C}{C} \text{ conjE}$$

Email: [tutorescs@163.com](mailto:tutorescs@163.com)

QQ: 749389476

<https://tutorescs.com>

**Proof:** Isabelle Demo

# Disjunction

程序代写代做 CS编程辅导

**consts** Or :: *bool*  $\Rightarrow$  *bool* ( $- \vee -$ )  
 $P \vee Q \equiv \forall R. (P \rightarrow Q \rightarrow R) \rightarrow R$

**Intuition:**

- Mirrors proof rules for  $\vee$  (case distinction)
- Try truth table for  $P$ ,  $Q$ , and  $R$

WeChat: [tutorcs](#)

**Proof Rules:**

Assignment Project Exam Help

$$\frac{A}{A \vee B} \quad \frac{B}{A \vee B} \text{ disjI1/2} \quad \frac{A \vee B \quad \frac{A \Rightarrow C \quad B \Rightarrow C}{C} \text{ disjE}}{C}$$

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

QQ: 749389476

**Proof:** Isabelle Demo

<https://tutorcs.com>

## If-Then-Else

程序代写代做 CS编程辅导

**consts**  $\text{If} :: \text{bool} \Rightarrow \alpha \rightarrow \alpha \rightarrow \alpha$  (if \_ then \_ else \_)

$\text{If } P \times y \equiv \text{SOME } z. \text{true} \longrightarrow z = x) \wedge (P = \text{False} \longrightarrow z = y)$

**Intuition:**

- for  $P = \text{True}$ , right hand side collapses to  $\text{SOME } z. z = x$
- for  $P = \text{False}$ , right hand side collapses to  $\text{SOME } z. z = y$

Assignment Project Exam Help

**Proof Rules:**

Email: [tutorcs@163.com](mailto:tutorcs@163.com)

$$\frac{}{\text{if True then } s \text{ else } t = s} \text{ifTrue} \quad \frac{}{\text{if False then } s \text{ else } t = t} \text{ifFalse}$$

<https://tutorcs.com>
