程序代写代做 CS编程辅导

- λ calculus syntax
- free variables, subst
- β reduction
- α and η conversion
- β reduction is confluent
- λ calculus is expressive (Turing complete)
- λ calculus is inconsistent (as a logic)

Content

程序代写代做 CS编程辅导

→ Foundations & Principles

- Intro, Lambda calculus [1,2]
- Higher Order Logic (part 1) [2,3^a]
- Term rewriting [3,4]

→ Proof & Specification Techniques

- Inductively defined sets, rule induction [4,5]
- Datatype induction, primitive recursion [5,7]
- General recursive functions, termination proofs [7^b]
- Proof automation, Isar (part 2) [8]
- Hoare logic, proofs about programs, invariants [8,9]
- C verification [9,10]
- Practice, questions, exam prep [10^c]

λ calculus is inconsistent

程序代写代做 CS编程辅导

Can find term R such

$\vdash_{\beta} \text{not}(R \ R)$

There are more terms

that make sense:

$\vdash_{\beta} z, \text{true false, etc.}$

WeChat: cstutorcs

Assignment Project Exam Help

λ calculus is inconsistent

程序代写代做 CS编程辅导

Can find term R such

$\vdash_{\beta} \text{not}(R \ R)$

There are more terms that make sense:
 $\vdash_{\beta} \text{true}$, $\vdash_{\beta} \text{false}$, etc.

WeChat: cstutorcs

Solution: rule out ill-formed terms by using types.

QQ: 749389476

<https://tutorcs.com>

Introducing types

程序代写代做 CS编程辅导

Idea: assign a type to each “sensible” λ term.

Examples:

→ for $term\ t\ has\ type\ \alpha$

$t :: \alpha$

WeChat: cstutorcs

Assignment Project Exam Help

Email: tutorcs@163.com

QQ: 749389476

<https://tutorcs.com>

Introducing types

程序代写代做 CS编程辅导

Idea: assign a type to each “sensible” λ term.

Examples:

→ for term t has type  $t :: \alpha$

→ if x has type α then  is a function from α to α

Write: $(\lambda x. x) :: \alpha \Rightarrow \alpha$

WeChat: cstutorcs

Email: tutorcs@163.com

QQ: 749389476

<https://tutorcs.com>

Introducing types

程序代写代做 CS编程辅导

Idea: assign a type to each “sensible” λ term.

Examples:

- for term t has type $t :: \alpha$
- if x has type α then $(\lambda x. t)$ is a function from α to α
- Write: $(\lambda x. x) :: \alpha \Rightarrow \alpha$
- for $s t$ to be sensible:

WeChat: cstutorcs

s must be a function

t must be right type for parameter

If $s :: \alpha \Rightarrow \beta$ and $t :: \alpha$ then $(s t) :: \beta$

Assignment Project Exam Help

- $=_\beta$ is decidable Email: tutorcs@163.com
To decide if $s =_\beta t$, reduce s and t to normal form (always exists, because \rightarrow_β terminates), and compare result.
- $=_{\alpha\beta\eta}$ is decidable QQ: 749389476
This is why Isabelle can automatically reduce each term to $\beta\eta$ normal form.

What does this mean for Expressiveness?

程序代写代做 CS编程辅导

So...

- typed functional language featuring complete
- but λ^\rightarrow is not...
- How does this work
- By adding one single constant, the Y operator (fix point operator), to λ^\rightarrow
- This introduces the nontermination of the types removed, but in a safe way that prevents inconsistency

WeChat customers
Assignment Project Exam Help

$Y :: (\tau \Rightarrow \tau) \Rightarrow \tau$

Email: tutorcs@163.com

Fact: If we add Y to λ^\rightarrow as the only constant, then each computable function can be encoded as closed, type correct λ^\rightarrow term.

- Y is used for recursion
- lose decidability (what does $Y(\lambda x. x)$ reduce to?)
- (Isabelle/HOL doesn't have Y; recursion is more restricted)

Schematic Variables

程序代写代做 CS编程辅导

→ X and Y must be  to apply the rule

WeChat: cstutorcs

Assignment Project Exam Help

Email: tutorcs@163.com

QQ: 749389476

<https://tutorcs.com>

Schematic Variables

程序代写代做 CS编程辅导

- X and Y must be instantiated to apply the rule

But: lemma “ $x + 0 = 0 + x$ ”

WeChat: cstutorcs

- x is free
- convention: lemma must be true for all x
- during the proof, x must not be instantiated

Email: tutorcs@163.com

QQ: 749389476

<https://tutorcs.com>

Schematic Variables

程序代写代做 CS编程辅导

- X and Y must be **introduced** to apply the rule

But: lemma “ $x + 0 = 0 + x$ ”

WeChat: cstutorcs

- x is free
- convention: lemma must be true for all x
- during the proof, x must **not** be instantiated

Email: tutorcs@163.com

Solution:

Isabelle has **free** (?), **bound** (?), and **schematic** (?X) variables.

Only schematic variables can be instantiated.

<https://tutorcs.com>

Free converted into schematic after proof is finished.

Higher Order Unification
